

Sagittaria Symposium

You are invited to a Symposium to discuss the environmental and economic impacts of Sagittaria (aquatic weed) on irrigation systems and waterways in northern Victoria and southern and central New South Wales. Potential downstream impacts of the spread of the weed will also be discussed.

The Symposium will comprise a guided tour of badly affected sections of the River Murray, wetlands and irrigation channels, followed by a facilitated workshop to develop a shared view on the way forward in tackling this issue.

Policy and decision-makers from the Murray Darling Basin Commission, rural water, catchment and river management authorities will be joined by representatives in the fields of science, research and agriculture at the Symposium.

When: Thursday March 18 2010

Time: 9am until 3.30pm

Venue: Cobram Barooga Golf Club,
Golf Course Rd, Barooga, NSW

The guided bus tour will depart from the Barooga Golf Club Car Park at 9am, returning for lunch by 1pm. The facilitated workshop will run from 1.45pm through to 3.30pm.

RSVP: Friday 12th March for catering purposes
